

Mom's Raasoi

Online Tiffin Service Application (KBM1)

Esha Mitra (201B107)

Navanshu (201B164)

Prince Katare (201B197)

Follow below steps to run the project

- Go to path `.\Backend\config` and update the **jwtKey** and **mongoDb** in **default.json** file.
 - **jwtKey** - Your own json web token key
 - **mongoDb** - Your mongoDB atlas URL containing your userID as well as password
- Go to path `.\src` and update the **apiUrl** and **localStorageKey** in **config.json** file.
 - **apiUrl** - Backend api URL to be connected to the frontend.
 - **localStorageKey** - Your own local storage key
- In the terminal run command **npm i**.
- Run command **npm start**.
- Simultaneously go to `.\Backend` and in the terminal run command **npm i**.
- In same directory run command **node index.js**
